WYMAN TWP (T4R3), FRANKLIN CO., MAINE  
AREA 36 ACRES

MIDAS # 0172

# JONES POND

Wyman Twp., Franklin County  
U.S.G.S. Sugarloaf Mtn., Maine (7½')

## Fishes

Minnows  
Creek chub

## Physical Characteristics

Area - 36 acres

Temperatures:  
Surface - 78°F

Maximum depth - 3 feet

Principal fisheries: None

Jones Pond is located south of the Bigelow Mountain Range and near the Appalachian Trail. A small inlet enters the northeast side of the pond and its outlet flows south into Stratton Brook. The pond's shoreline is mostly undeveloped.

Water quality in Jones Pond is poor for coldwater gamefish. The pond is uniformly shallow with a soft, muddy bottom and extensive areas of emergent vegetation. Evidence of an old log driving dam on the outlet suggests that the pond was once deeper and may have supported brook trout, but it presently is better suited to wildlife. The pond is not stocked.

Jones Pond is accessible via gravel roads east of Routes 16 and 27. The pond is open to fishing under general law in the summer months and closed to ice fishing.

Surveyed - July, 1987
